94 CBR600F2 Project - \$500 (Louisville)

image 2 of 3

1994 Honda CBR 600f2

fuel: gas

transmission: manual

I have a 94 CBR600F2 project. Needs starter boss repaired (drill and tap a m8 bolt) shift forks, oil pump pickup, and oil pan reinstalled. Other than that it just needs put back together. I have all the parts including extra clutch, except for the stock fairings. frame is straight and clean. I took it apart to replace second gear and just lost interest. Runs very good when together. Has around 36k original miles. I also have a cheap cheetah street 2003 cbr600rr front fairing with hid lights, seat, tail, and integrated led taillight I was running on it before I took it off the street. I have added a couple pics to show what it looks like together. New fork seals, brake pads, chain, lowering link. Also have new valve cover gasket to install. everything is there like I said, except the fairings. could be put together in a day max. Clean and clear Georgia title in my name. I'm asking 500. I know exactly what the parts are worth separate so please no low ball offers. Must bring a vehicle with room to carry all the parts. Need gone asap.
